

Abir Htira

Network & Security Engineer | SOC Analyst | Detection & Incident Response

Profile

Engineering graduate specialized in cybersecurity, SOC operations, network security, and secure infrastructure. Skilled in threat detection, incident response, network traffic analysis, security monitoring, and automation.

Core Skills

- SOC Operations
- SIEM & Security Monitoring
- Alert Triage & Incident Analysis
- Threat Detection & Threat Hunting
- Incident Response
- Threat Intelligence & IOC Analysis
- MITRE ATT&CK
- EDR / XDR
- IDS / IPS
- SOAR & Security Automation
- Firewalling & NGFW
- Palo Alto Networks
- Fortinet / FortiGate
- VPN
- VLAN & Network Segmentation
- NAT
- Network Traffic Analysis
- Wireshark
- Nmap
- TCP/IP
- LAN / WAN
- Routing & Switching
- OSPF
- Network Troubleshooting
- 3G / 4G / 5G
- QoS & Network Monitoring
- Windows / Windows Server
- Linux / Kali Linux
- Active Directory
- Docker / Docker Compose
- VMware
- Wazuh
- Microsoft Sentinel
- Elastic / ELK
- OpenSearch
- TheHive
- Cortex
- MISP
- VirusTotal
- Grafana / Prometheus / Loki
- Python
- REST API
- Webhooks
- Security Automation
- SOAR Orchestration

Certifications

- Fortinet Introduction to the Threat Landscape 3.0
- Fortinet Network Security
- Oracle AI Fundamentals

Abir Htira - Resume

- Oracle Cloud Infrastructure
- Certified Phishing Prevention Specialist

Experience

Network & Cybersecurity Engineer - SOC

Final-Year Internship / PFE

Feb. 2026 - Jul. 2026

Academic Projects

- AI-based Android Attack Detection - Design and development of an AI-based system for detecting Android attacks (rooting, privilege escalation, malicious behaviors). Extraction of system and network indicators, training of classification models (LSTM, Random Forest), and integration into a supervision platform for proactive mobile threat detection. Tools: Python, Wireshark, TShark, GNS3, VirtualBox.
- VoIP/SMS QoS Analysis - Deployment of a VoIP (SIP/RTP) and SMS (SMPP) environment under Linux with controlled network congestion using iPerf3. Implementation of QoS mechanisms (tc/netem, DSCP marking, Weighted Fair Queuing) and performance analysis (latency, jitter, packet loss) using Wireshark.
- CV Management Web Application - Development of a web application for CV management and centralization. Technologies: React.js, Node.js, MongoDB.

Education

Communications & Networks Engineering (ENIG, 2026)

Focused on network security and cybersecurity.

Languages

French, English, Arabic
