PROFESSIONAL SUMMARY

Information Security Analyst and Network & Cybersecurity Engineer (ENIG, 2026). Proactively monitor systems for **suspicious activity**, analyze **security incidents** and respond to threats in real time using **SIEM (Wazuh)**, **EDR/XDR** and **firewall logs (Palo Alto, Fortinet)**. Designed and operated a full **SOC lab**: **detection rules**, false-positive reduction, **event correlation** mapped to **MITRE ATT&CK**, incident investigation, threat **containment** and post-incident reporting. Configured and administered **firewalls** and **IPS** (security policies, **NAT**, **VPN**, **VLAN** segmentation) and developed Python automations (REST API, webhooks) for **incident response**. Tracked **security metrics (MTTD, MTTR)** and authored incident and validation reports. Stay current on emerging threats through **threat intelligence (MISP, IOC feeds, VirusTotal)** and **MITRE ATT&CK**. Detail-oriented problem solver who works well with IT and security teams.

PROFESSIONAL EXPERIENCE

Network & Cybersecurity Engineer — SOC (Final-Year Internship / PFE) — Innov Alliance Tech (IAT), Tunis Feb 2026 – Jul 2026

- Monitored systems for **suspicious activity** and **security incidents** in a full **SOC lab** on a segmented network (**SOC, DMZ, Active Directory**), containerized with Docker Compose on VMware, delivered in Scrum over 6 sprints.
- Deployed and administered the **Wazuh 4.14 SIEM** (agents, **Wazuh Indexer on OpenSearch**): log collection, normalization, correlation, real-time **threat detection** and custom **detection rules**.
- Collected and analyzed **EDR/XDR** endpoint logs and **Palo Alto** and **Fortinet firewall** logs (internal and external traffic), with custom decoders for parsing and normalization.
- Configured and administered **Palo Alto PA-220** and **Fortinet firewalls** (security policies, **NAT**, **VPN**, **VLAN** segmentation) to protect systems and networks.
- Automated threat **containment**: correlated **Wazuh** alerts with **IOC** feeds and triggered automatic blocking on the **Palo Alto PA-220 (NGFW/IPS)**, from detection to **containment** without manual intervention.
- Built a Python **SOAR** orchestrator (REST API, webhooks, **IOC** cache, automated **IPS** blocking, **TheHive-to-MISP** feedback loop) to reduce manual triage time.
- Investigated 5 attack scenarios end to end (**Nmap** reconnaissance, **DoS**, **SSH brute-force**, **DNS C2/sinkhole**, **malware IOC**), mapped to **MITRE ATT&CK**; documented incidents in **TheHive** and enriched indicators with **Cortex**, **MISP** and **VirusTotal**.
- Tracked **security metrics (SOC KPIs: MTTD, MTTR)** with Grafana, Prometheus and Loki; authored technical validation reports and incident reports with **post-incident analysis**.

Engineering Intern — Radio Networks — Tunisie Télécom, Tunis Jul 2025 – Sep 2025

- Analyzed radio KPIs and QoS across 3G/4G/5G networks (**TCP/IP-based**) using Huawei OSS tools (SmartCare, Discovery, U2020).

Technician Intern — Network Equipment — Tunisie Télécom, Gabès Aug 2024 – Sep 2024

- Installed and maintained network, radio and optical equipment; monitored technical alarms.

EDUCATION

Engineering Degree, Communications & Networks Engineering (Bac+5, Master's equivalent) — ENIG, Gabès 2023 – 2026

Preparatory Cycle, Physics-Chemistry — IPEIG, Gabès 2019 – 2022

TECHNICAL SKILLS

Threat Monitoring & SIEM : Wazuh (SIEM), EDR/XDR, Microsoft Sentinel, Elastic Stack (ELK), OpenSearch, security monitoring, alert triage, log analysis, event correlation, detection rules, false-positive analysis

Incident Response & Investigation : TheHive, Cortex, incident response, incident investigation, threat containment, post-incident analysis, case management, SOAR, security reporting

Firewall & Network Security : Firewalling: Palo Alto Networks (NGFW/IPS), FortiGate/Fortinet, firewall policies, IDS/IPS, TCP/IP, VLAN, NAT/VPN, network traffic analysis, Wireshark

Threat Intelligence : MISP, VirusTotal, IOC analysis & enrichment, threat feeds, IP reputation, threat hunting, MITRE ATT&CK, TTPs, malware analysis, emerging threats

Security Testing : Attack simulation and testing (reconnaissance, DoS, brute-force, DNS C2, malware), Nmap, Kali Linux

Systems, Cloud & Automation : Windows, Windows Server, Active Directory, Linux, VMware, Docker, Microsoft Azure, Python, REST APIs, webhooks, Grafana, Prometheus, Loki

Documentation & Communication : Technical documentation, security procedures, incident reports, security metrics reporting, cross-team collaboration

CERTIFICATIONS & LANGUAGES

Certifications : Cisco CyberOps, CCNA 1, CCNA 2 · **Fortinet** Threat Landscape 3.0, Network Security · Oracle AI Fundamentals, Cloud Infrastructure · Certified Phishing Prevention Specialist

Languages : English (B2) · French (B2) · Arabic (native)
