

Abir Htira

Network & Security Engineer | SOC Analyst

Tunis, Tunisia | +216 58 279 010 | abirhtira@gmail.com | [linkedin.com/in/abirhtira](https://www.linkedin.com/in/abirhtira) | github.com/abirhtira | abirhtira.github.io/Abir-htira

PROFESSIONAL SUMMARY

Engineering graduate in Communications & Networks Engineering (ENIG, 2026), specialized in infrastructure, networks and IT security. Hands-on experience monitoring, tracking and remediating security vulnerabilities across a segmented environment: coordinating fixes, hardening and configuration changes on servers, endpoints, firewalls and network devices, then validating remediation effectiveness. Practical background administering Windows Server and Linux, troubleshooting Active Directory/DNS, and maintaining virtualized (VMware) and containerized (Docker) infrastructure. Solid grounding in network fundamentals (TCP/IP, VLAN, VPN, firewalls, dynamic routing OSPF/BGP), endpoint monitoring (Wazuh agents), and security baseline/configuration compliance. Tracks remediation KPIs (MTTD, MTTR, false-positive rate) and documents vulnerabilities, remediation plans and procedures with rigor. Comfortable coordinating with cross-functional teams under service-level timelines.

PROFESSIONAL EXPERIENCE

Infrastructure & Security Engineer — Final-Year Internship (PFE)

Feb 2026 – Jul 2026

Innov Alliance Tech (IAT) — Tunis, Tunisia

- Monitored, tracked and remediated security vulnerabilities across a segmented environment (SOC, DMZ, Active Directory), coordinating fixes across servers, endpoints and network devices, and validating remediation effectiveness through follow-up testing (5 scenario-based assessments mapped to MITRE ATT&CK).
- Deployed and maintained servers (Windows Server, Linux) and a virtualized (VMware) and containerized (Docker Compose) infrastructure, integrating Active Directory and VLAN segmentation; troubleshoot server, DNS and Active Directory issues (authentication, name resolution, GPO/replication).
- Implemented security fixes, hardening measures and configuration changes on firewalls (Palo Alto PA-220, Fortinet): security policies, NAT, filtering, segmentation, with backups and incremental validation of each change.
- Continuously monitored system integrity and security baselines via a SIEM (Wazuh) and monitoring tools (Grafana, Prometheus), tracking remediation KPIs (MTTD, MTTR, false-positive rate) and documenting vulnerabilities, remediation plans and procedures.
- Automated detection and remediation workflows (Python, REST API) to speed response, and performed vulnerability/configuration-compliance testing (Kali Linux, Nmap, Wireshark) to validate security controls end to end.

Engineering Intern — Radio Optimization

Jul – Sep 2025

Tunisie Télécom — Executive Radio Networking Division, Tunis

- Daily monitoring and verification of mobile network (3G/4G/5G) performance indicators (KPIs); identified degradations and system anomalies.
- Monitored and diagnosed equipment via Huawei OSS tools (SmartCare, Discovery, U2020).

Technician Intern

Aug – Sep 2024

Tunisie Télécom — Gabès, Tunisia

- Installed and maintained network equipment (optical and radio); monitored technical alarms and assisted the operations team on field interventions.

EDUCATION

Engineering Degree, Communications & Networks Engineering (Bac+5, equivalent to a Bachelor's/Master's degree)

École Nationale d'Ingénieurs de Gabès (ENIG) | 2023 – 2026

Preparatory Cycle, Physics–Chemistry

IPEIG — Institut Préparatoire aux Études d'Ingénieurs de Gabès | 2019 – 2022

TECHNICAL SKILLS

Vulnerability Management & Remediation: Vulnerability monitoring/tracking, remediation coordination, patch management, system hardening, configuration changes, follow-up verification, MITRE ATT&CK-mapped assessments

Infrastructure Operations: Windows Server, Linux (UNIX environment), Active Directory (GPO, replication, troubleshooting), DNS/DHCP, virtualization (VMware), containerization (Docker), routine operational checks

Network Fundamentals: TCP/IP, LAN/WAN, routing & switching, dynamic routing (OSPF, BGP), VLAN, VPN, firewalls (Palo Alto, Fortinet), network segmentation

Security Monitoring & Compliance: SIEM (Wazuh), system integrity monitoring, security baseline & configuration compliance, log analysis, incident detection and documentation

User & Security Support: Access control and authentication troubleshooting (Active Directory), endpoint monitoring (Wazuh agents), secure remote access (VPN)

Reporting & Governance: Remediation KPI tracking (MTTD, MTTR, false-positive rate), technical and compliance documentation, Microsoft Visio (infrastructure & network diagrams)

Tools & Automation: Python, REST APIs, Kali Linux, Nmap, Wireshark

Soft Skills: Strong analytical and troubleshooting skills, accountability and ownership, cross-functional collaboration, organization and follow-up, ability to manage multiple priorities

CERTIFICATIONS & LANGUAGES

Certifications: Cisco CyberOps, CCNA 1, CCNA 2 · Fortinet Introduction to the Threat Landscape 3.0, Network Security · Oracle AI Fundamentals, Cloud Infrastructure · Certified Phishing Prevention Specialist

Languages: English (B2) · French (B2) · Arabic (native)
